DORSE

**Wheat 4-fold less 2 quarters 1 bushel** The same answers for 61 quarters 6 bushels wheat of issue, of which 6 quarters threshed by servants and the rest by piece-work, of which of curall in total 9 quarters. And for 1 quarter excess measure by examination of the account.†† Sum 62 quarters 6 bushels.

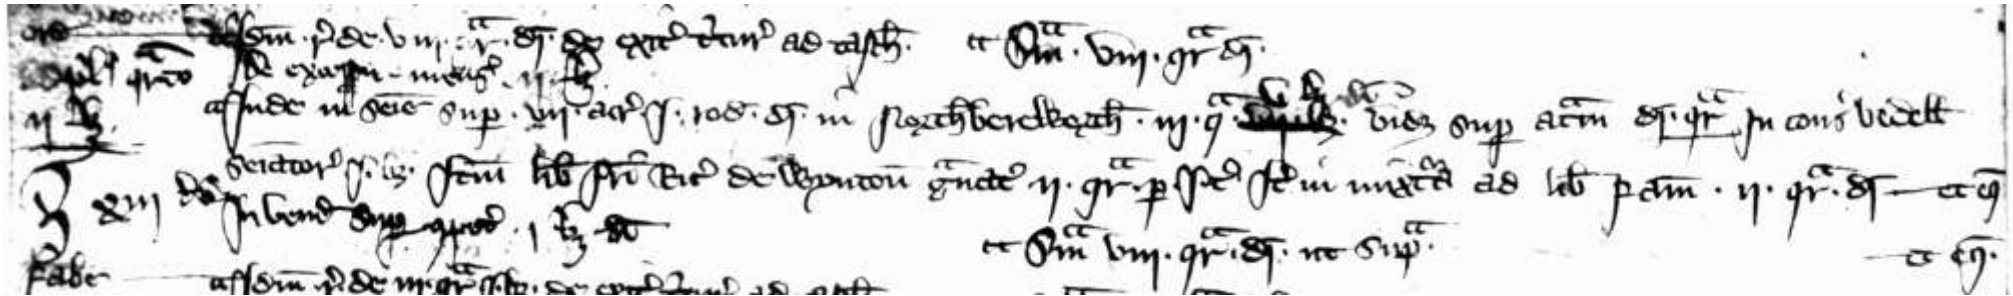

\*\* Only the 8s has been deducted. The 18s for oats has been noted but not deducted.

†† This excess has not been included when calculating the yield. The comparable entry under Barley seems to have been included in the yield. The accounts for the next 2 years have not survived, but the roll for 1332/33 now in the Bodleian, has no similar entry. However, in 1335/36 (WAM 27313) the term 'mensura rasa' - 'by struck measure' - is introduced, whereby the grain in the measure was struck level rather than being heaped. Page (WPR1301-2) says that heaped measure increased the volume by a quarter, the difference being called the increment. The Thorncroft accounts (SRS Vol. XV, p.47, &c) show a 25% increase. The first mention of the word increment in the Morden accounts is in WAM 27321 (1346/47). From WAM 27323 the increment is calculated at just 1 peck per full quarter, around 3%, for all types of grain, but later records (WAM 27327 onwards) explain that, in Morden, only the eighth bushel was left heaped at 5 pecks, the other seven being struck at 4 bushels.

Of which in sowing over 4 acres 3 roods land in He[t]hcroft; 19 acres in Rotforlong; 16 acres in Lontelond in part because 6 acres 1 rood of which lies uncultivated; 8 acres in Dedemanneslond because the rest lies uncultivated; 16 acres in Waterden; 9 acres in Nyweburycroft in part because the rest lies uncultivated; 8 acres in Westschott in part because the rest uncultivated; which makes in total 79 acres 3 roods land, 21 quarters 1 bushel, namely over the acre 2 bushels plus in total 1 quarter 1½ bushels. In customary payment to sower 1 bushel. Also delivered to brother John de Asshwell, keeper of the granary 25<sup>29</sup> quarters by 2 tallies whereof 1 quarter is without tally. Also in maslin for servants' livery 9 quarters as shown below. Also in expenses of brother Thomas de Henle bailiff 1 bushel by 1 tally. Also in expenses of 202 men at harvest boonworks by custom 1 quarter 1 bushel. Also in sale 2 bushels. In sale at the audit 2 quarters. Sum as above. And it balances.

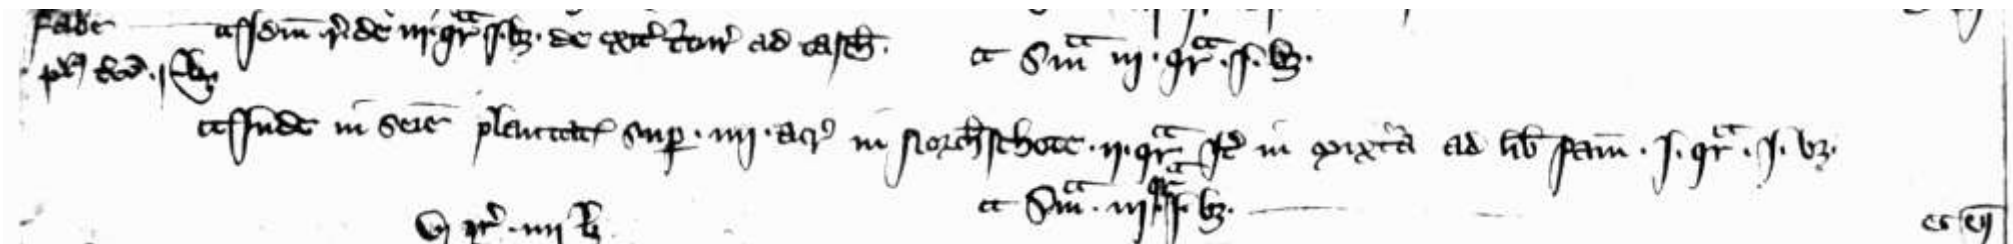

16s.

**Mixstillo** 3-fold plus 2 bushels The same answers for 4 quarters 6 bushels of issue threshed by piece-work. And accounted in maslin for servants' liveries 4 quarters 6 bushels. And it balances.

**Barley** 4-fold plus 2 bushels \*\* The same answers for 8½ quarters of issue threshed by piece-work. Sum 8½ quarters. Of the excess from the measuring 2 bushels.§§

13½d Of which in sowing over 7 acres 1½ roods in Northbereworth 3 quarters 7<sup>5/2</sup> bushels, namely over the acre ½ quarter. In customary payment to/by the beadle as/to the sower 1 bushel. Also delivered to brother Richard de Wynton keeper of the granary 2 quarters by 1 tally. Also in maslin for servants' livery 2½ quarters. And it balances. In sale at the audit 1½ bushels. Sum 8½ quarters as above. And it balances.

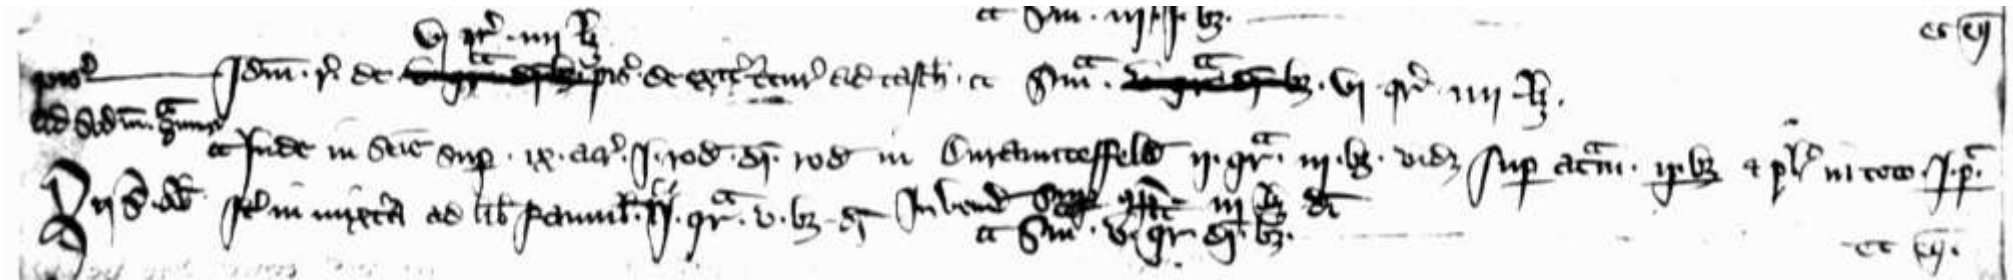

**Beans** 3-fold plus 1 bushel The same answers for 3 quarters 1 bushel of issue threshed by piece-work. Sum 3 quarters 1 bushel.

Of which in seed planted over 4 acres in Northschott 2 quarters. Also in maslin for servants' liveries 1 quarter 1 bushel. Sum 3 quarters 1 bushel. And it balances.

\*\* The yield on the previous year's 2 quarters 5 bushels barley sown was 3-fold plus 2 bushels, if the excess is included in the issue.

§§ This excess is not accounted for in the outgoing below. See note above for Wheat.

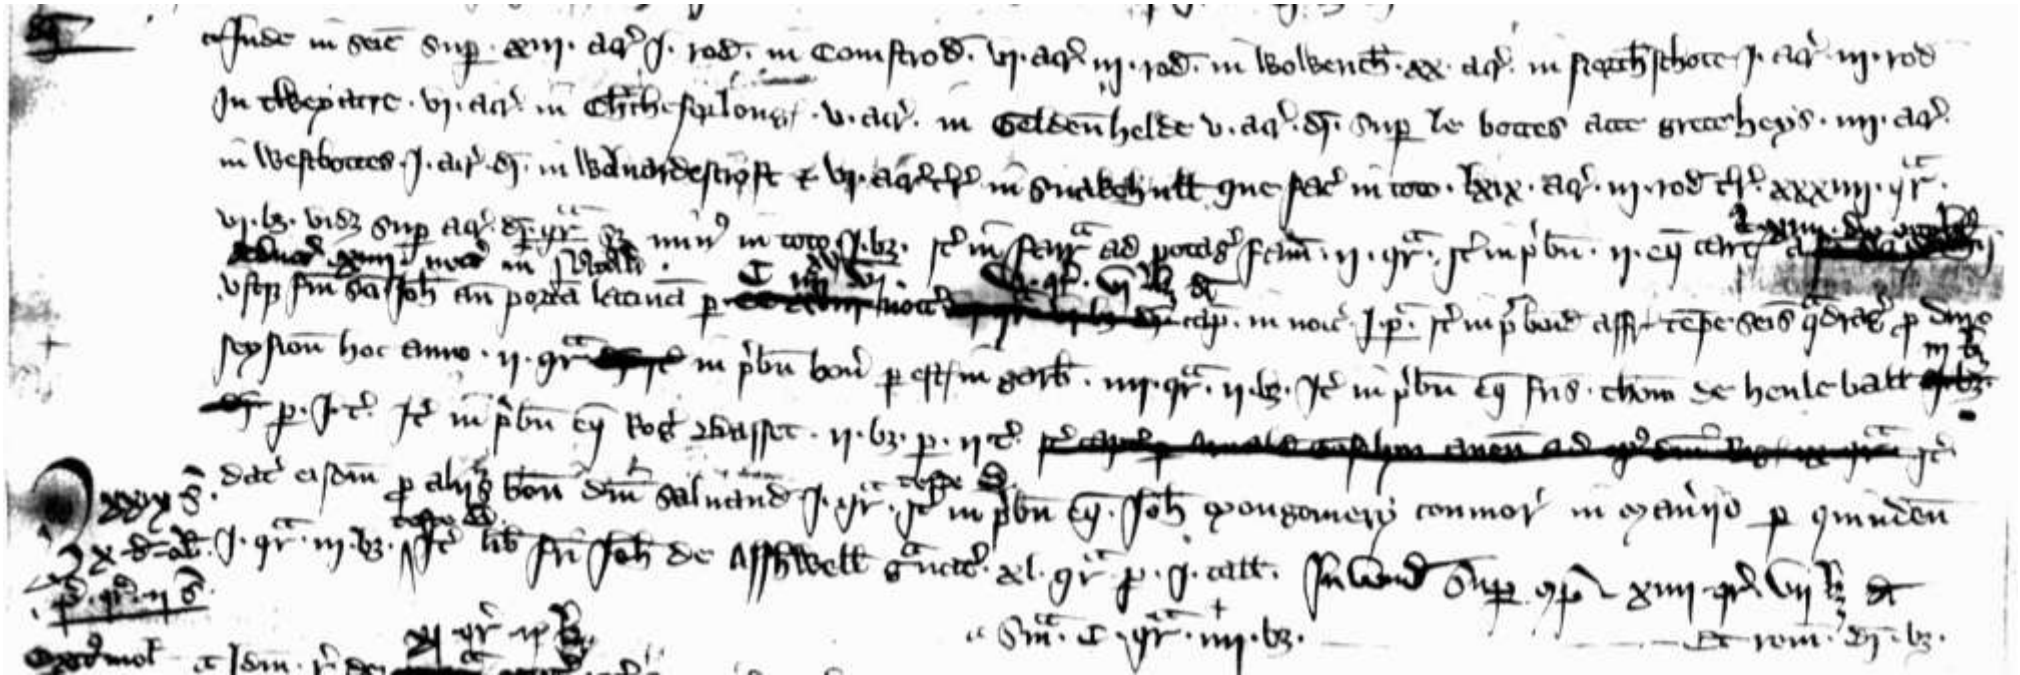

**Peas 2-fold** The same answers for 5 quarters 1/2 bushel <sup>6 quarters 4 bushels</sup> of peas of issue threshed by piece-work. \*\*\* Sum 5 quarters 1/2 bushel <sup>6 quarters 4 bushels</sup>
