Sum 3s 10d.

^{**} The dorse shows 1 quarter 4 bushels mixstillio issue of the grange threshed by piecework as well as 2 quarters 4 bushels from servile land in the lord's hand. The calculation and the total threshed are both based on 1 quarter 4 bushels.

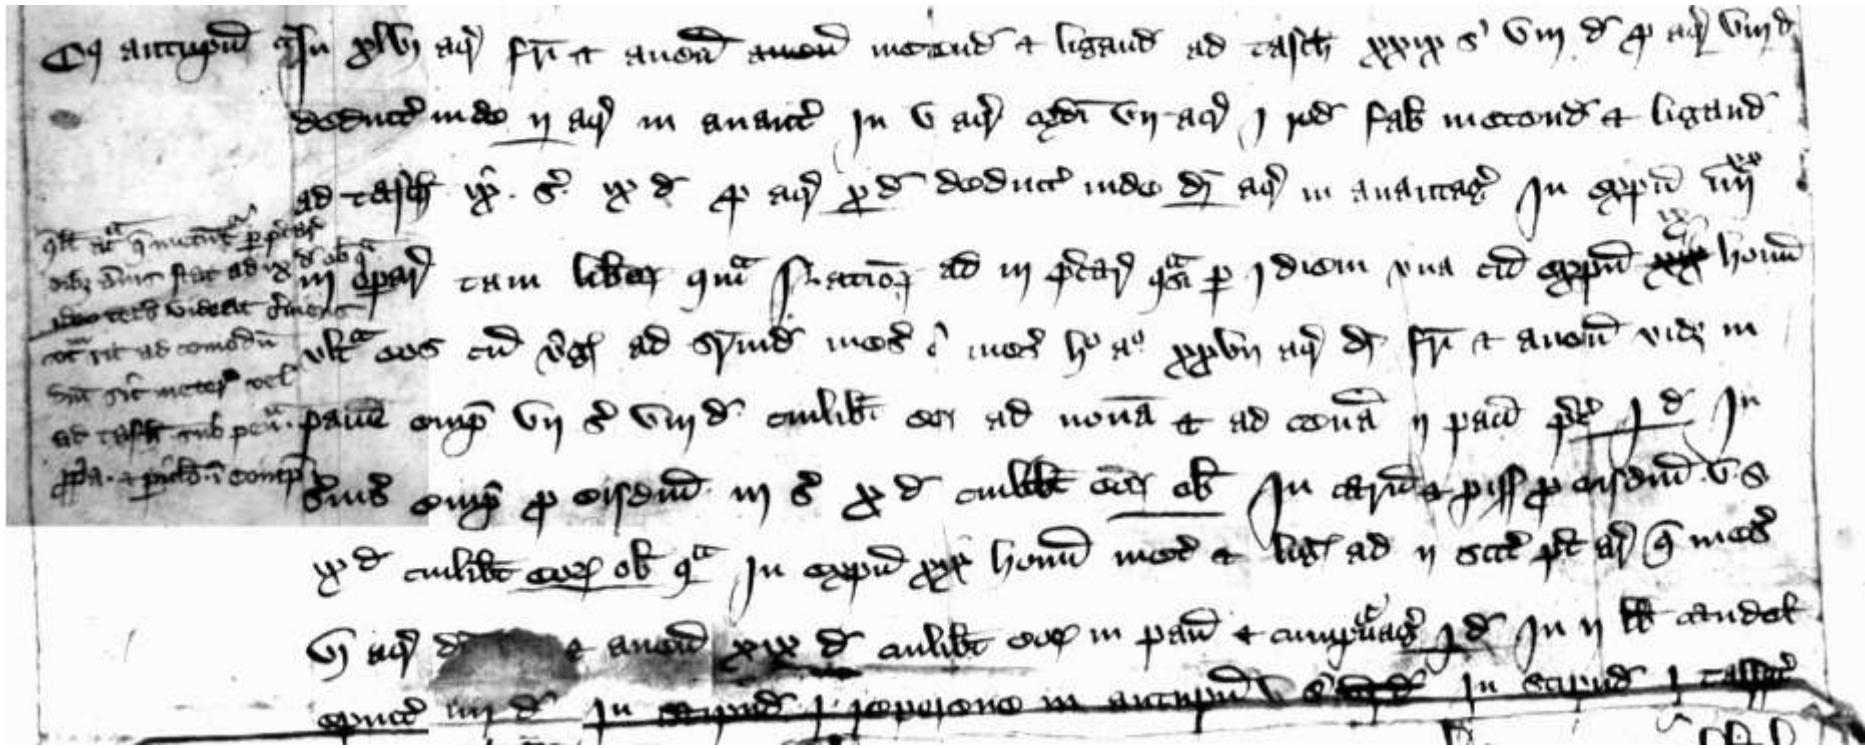

^{††} The quantities given here would have cost 26s 6d @6d per quarter of 8 bushels. (Previous accounts refer to 9 bushels to a quarter at threshing).

^{‡‡} The rates paid this year are double that paid in previous years. The rate for threshing oats, and the rate for winnowing have both trebled.

^{§§} These figures total 106 quarters. In earlier accounts, only half the total threshed was winnowed by piecework, the other half being winnowed by the dairy worker.

^{***} This section and the next are repeated, upside down and crossed through, after Harvest Costs. A separate membrane has been sown over it.

^{†††} In the crossed through text below this figure is 20d.

Harvest costs: (Each acre which they reap by boon-work in all years to cost 9³d, therefore henceforth the *serviens* is to see whether it is to the lord's profit to reap thus or by piecework, on personal pain and peril in the account)

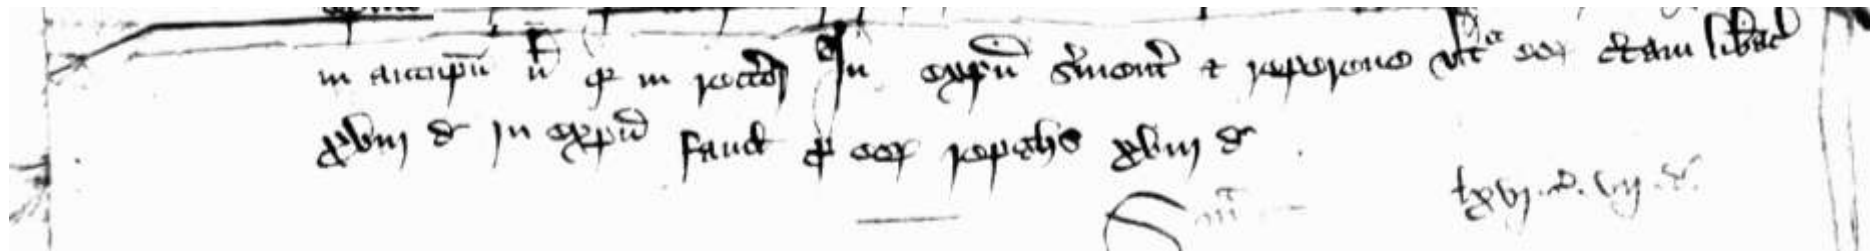

In reaping and binding 46 acres wheat and oats by piecework 29s 8d, per acre 8d,⁺⁺⁺ deducting therefrom 2 acres in gain. In reaping and binding 5 acres barley, 7 acres 1 rood beans by piecework 9s 9d, per acre 10d, deducting therefrom 1/2 acre in gain.^{sss} In expenses of 83 workers both free and servile at 3 boonworks as though for 1 day together with expenses of 49^{****} men over them with rods to superintend reapers who reaped this year 27 1/2 acres of wheat and oats, viz in bread bought 7s 8d, to each of them at noon and at supper 2 loaves, price 1d;⁺⁺⁺⁺ in ale bought for the same 3s 10d, to each of them 1/2d; in meat and fish for the same 5s 9d, to each of them 3/4d. In stipend of 1 reap-reeve in harvest 5s 6d. In stipend of 1 stacker

⁺⁺⁺ 46 quarters minus 2 @ 8d = 29s 4d not 29s 8d. However, the total given assumes 29s 8d.

^{sss} 7 acres 1 rood minus 1/2 acre @ 10d = 9s 9 1/2d, not 9s 9d. However, the total does not include the 1/2d.

^{****} In the crossed through text below the figure is 19 men.

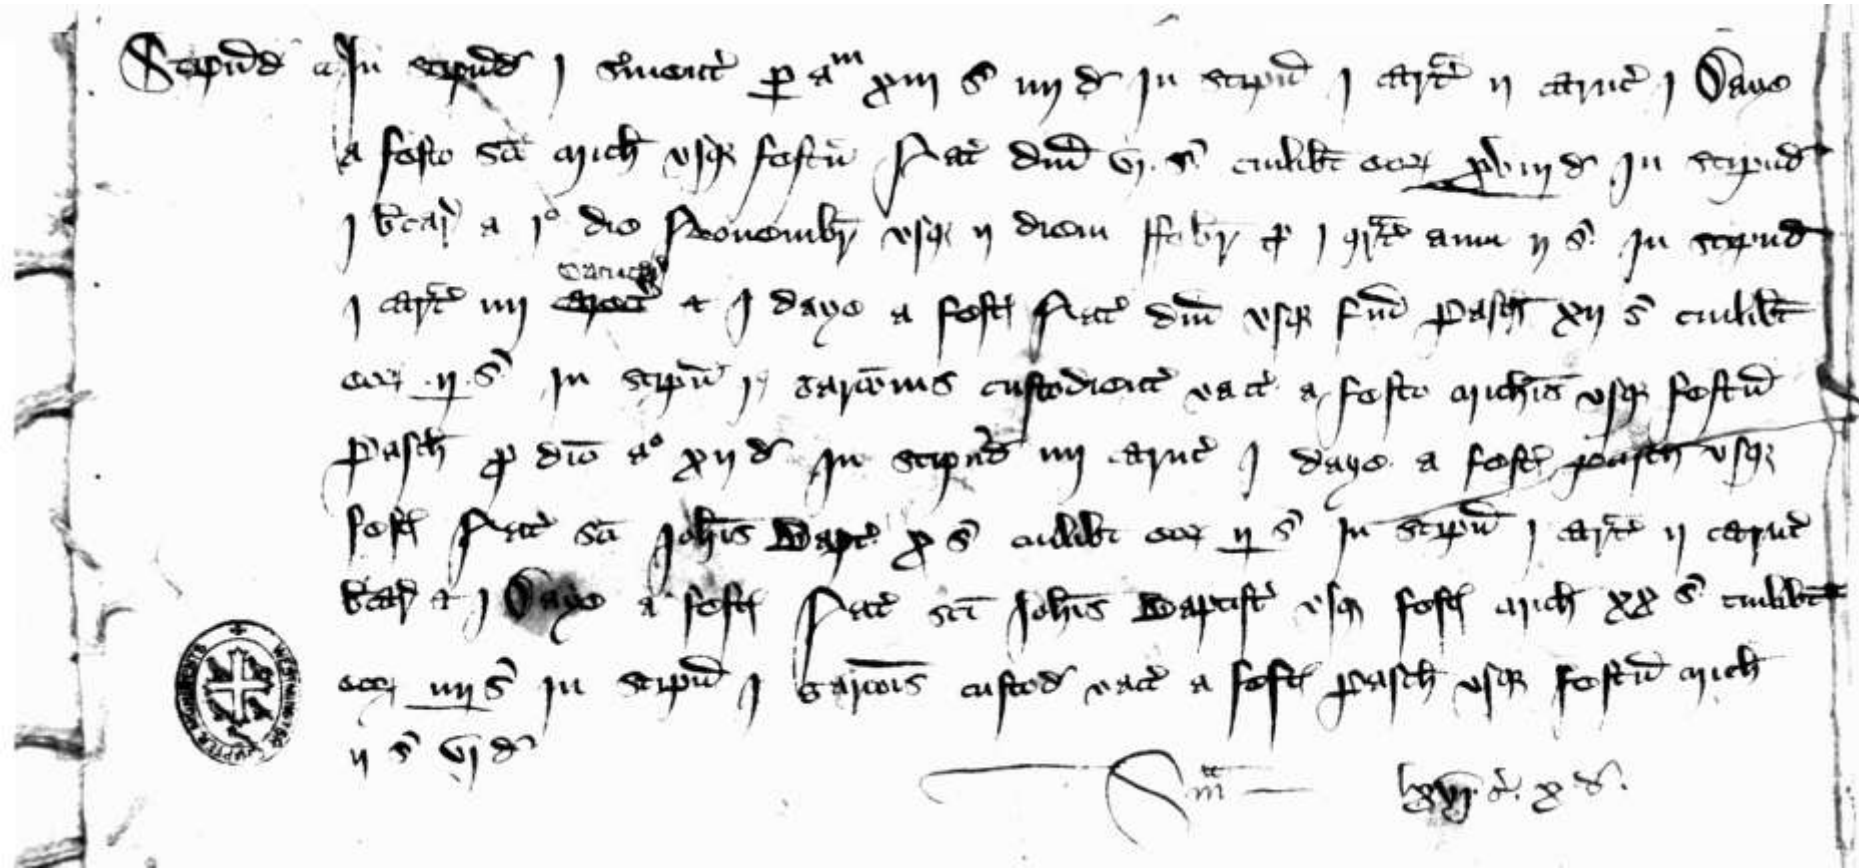

⁺⁺⁺⁺ ie 1/2d per loaf.

DORSE

Morden Issues of the grange at the same place by [struck] measure for 24th year— Thomas Broun *serviens*

Wheat

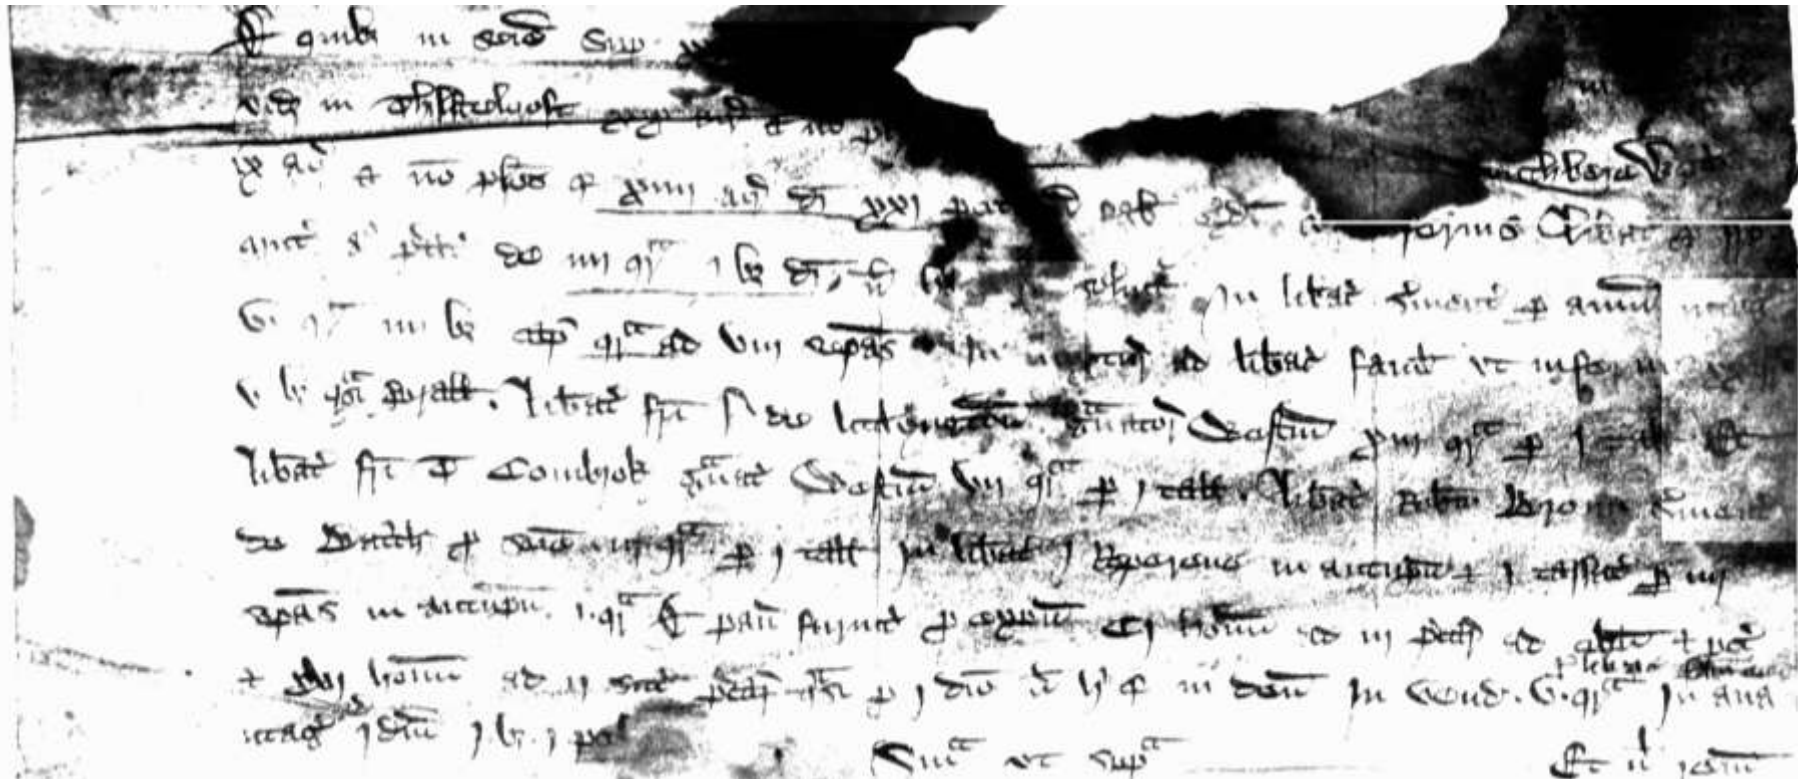

He answers for 2½-fold minus 2 quarters 3 bushels⁺⁺⁺⁺

First ^{he renders} his account for [46 quarters 4 bushels wheat, of which 20 quarters 5 bushels curall, of issue of the grange] at the same place by struck measure both from the demesne and from the said [——. And for 16 quarter 4 bushels of purchase⁺⁺⁺⁺ of which 12 [?quarters # bushels?] from the Rectory? And for 4?] bushels ^{1 peck} of increment^{sssss} of the heaped eighth [bushel] increment of the same. [Sum 63 quarters 4 bushels 1 peck].

++++ The issues identified in the Threshing section of this account would give a higher yield than that stated here, based on the quantities sown recorded in the previous year's account.

++++ According to the Dorset, 16 quarters 4 bushels wheat were purchased.

sssss increment – The manor apparently followed the custom of striking, or leveling, the first 7 bushels of a quarter of grain, but leaving the eighth bushel heaped. The reeve was charged for the difference between heaped and struck measure. In subsequent accounts it is calculated at 1 peck per full quarter, around 3%, or 25% of the bushel. This is the proportion found in Merton College and Bishop of Winchester accounts, though all eight bushels were struck on those manors. Beveridge 'Wheat Measures in the Winchester Rolls' Economic History Review 5 (1930) found just one example of the eighth bushel being left unstruck.

Of which in sowing over [28 acres land 7 quarter 5 bushels, over the acre 2 bushels 1 peck minus in total 2 bushels]***** viz in Thilstelcroft 19 acres and no more [because 3 acres , in] Southbereworth 9 acres and no more because 14½ acres 21 perches with beans and barley. In sale 5 quarters. ^{for servants' livery} In gain ^{***** for} the same 1 bushel 1 peck. Sum as above.††††† And none remains.

***** The following year's yield of 2-fold requires 7 quarters 5 bushels to have been sown this year, which works out at just under the usual 2 quarters 1 peck per acre over the 28 acres sown.

††††† 4 quarters 1½ bushels of new grain had been consumed in the previous year by 'exchange'.

††††† In Harvest Costs, bread bought was for 92 men, not 101.

§§§§§ 19 men according to Harvest Costs, not 16.

***** The usual 3% increment is also applied to grain bought and sold.

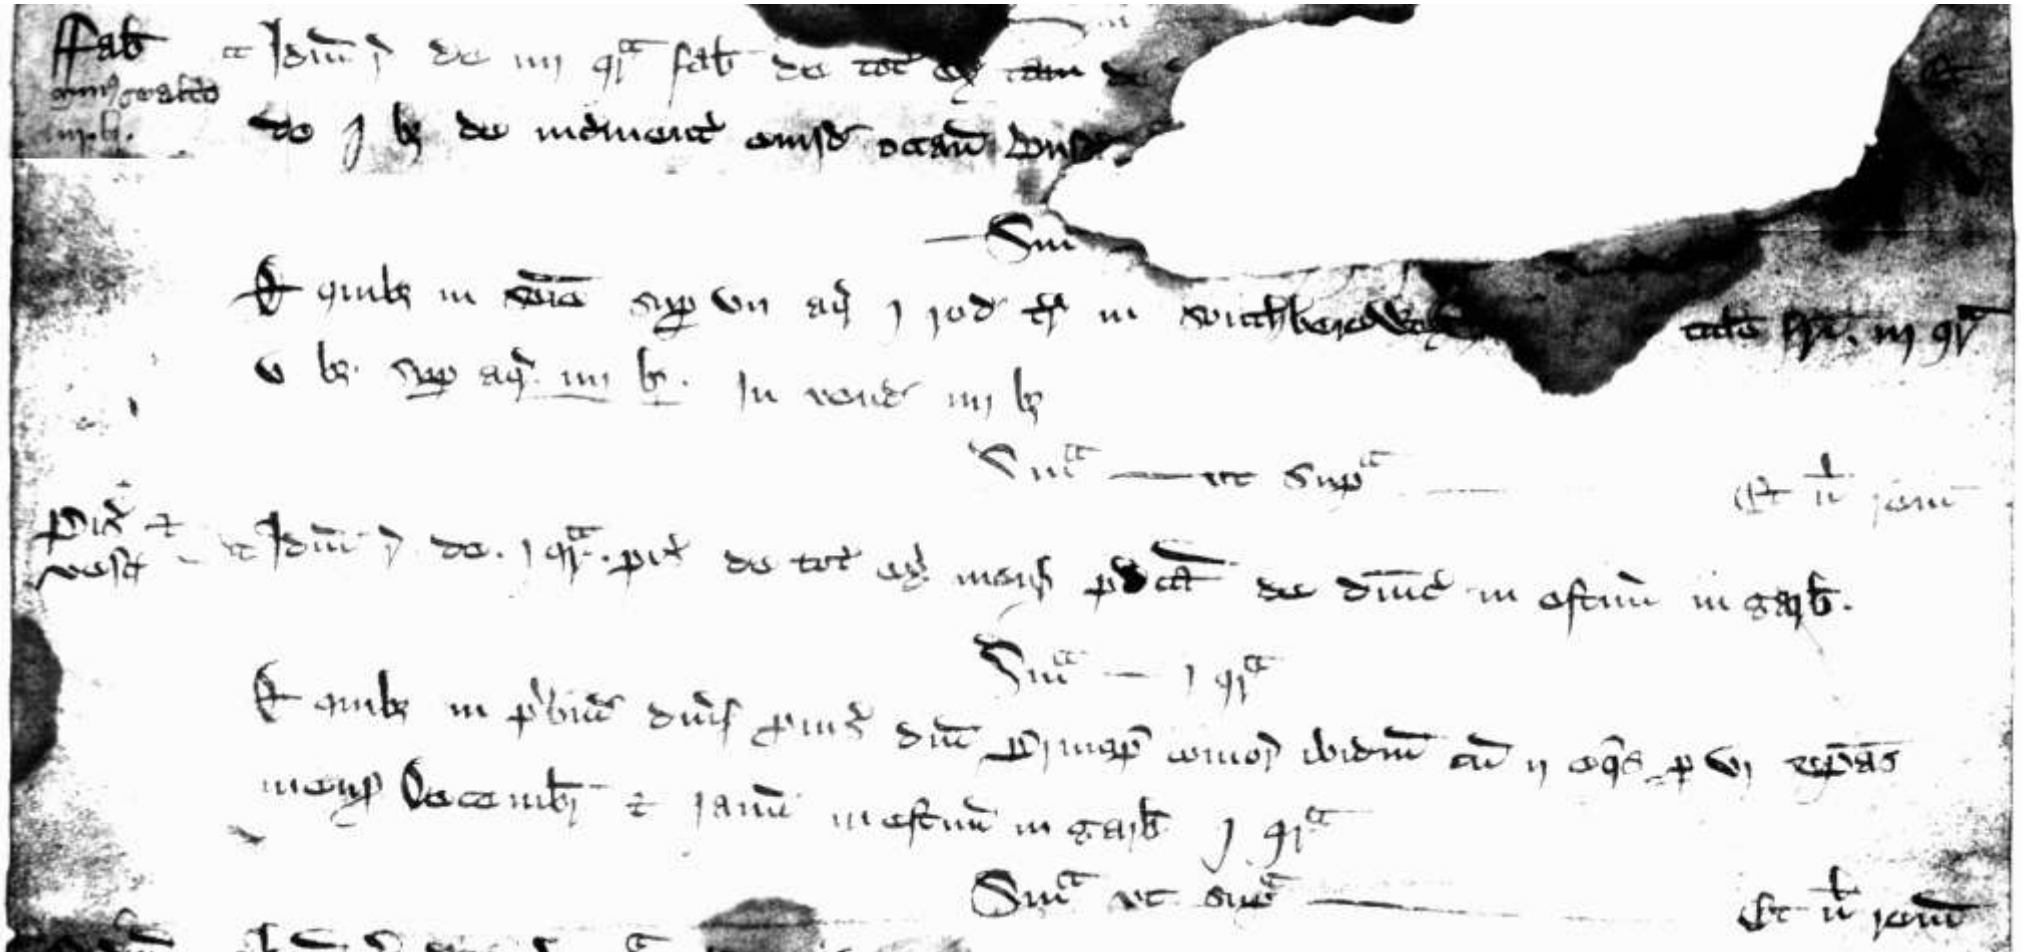

††††† These figures total 63 quarters 7 bushels 1 peck. The membrane is badly damaged, but missing amounts have been supplied [in brackets] from other parts of the account or else by calculation.
